Summary

Python Backend & AI/ML Engineer with hands-on experience in Computer Vision, OCR automation, Odoo ERP customization, and data analytics. Skilled in building scalable AI-driven applications using Python, OpenCV, TensorFlow, Flask, SQL, and Power BI. Experienced in developing automation workflows, OCR-based solutions, and business-focused ERP modules for real-world applications. Strong foundation in backend development, machine learning, REST APIs, and workflow optimization with a passion for solving practical business problems using AI and software engineering.

Education

Bachelors in Artificial Intelligence and Machine Learning Engineering

Vidyavardhaka College of Engineering, Mysuru.

2021 - 2025

Pre-University Course (PUC) in PCMCs

Sadvidya Semi-Residential PU College, Mysuru.

2020 - 2021

Secondary School Leaving Certificate (SSLC)

Bharatiya Vidya Bhavan, Mysuru

2018 -2019

Work Experience

Trainer & AI Developer - Pas3CyberLabs LLP (Present)

Mar 2026- Present

- Trained students and interns in AI/ML, Python, and Computer Vision through hands-on project-based learning.
- Mentored learners in real-world AI application development, deployment workflows, and automation projects.
- Managed and optimized website content delivery and technical performance.
- Implemented AI tools and automation strategies to improve training efficiency and productivity.

Technical Developer -- Prixgen Tech Solutions Pvt Ltd

Jun 2025 – Sep 2025

- Customized and developed Odoo ERP modules based on client-specific business requirements.
- Designed dynamic PDF and QWeb reports for business analytics and automated reporting processes.
- Developed and optimized backend functionalities, improving application performance and maintainability.
- Collaborated with cross-functional teams to implement scalable ERP solutions and workflow automation features.
- Worked with SQL databases, debugging, and module integration to ensure reliable system performance.
- Applied Git-based version control and testing practices during module development and deployment.

AI Intern / Trainee – Prixgen Tech Solutions Pvt Ltd

Jan 2025 – Apr 2025

- Developed OCR-based solutions using Tesseract OCR and Computer Vision techniques for document and business card data extraction.
- Worked on AI-driven image processing applications using Python and OpenCV.
- Gained hands-on experience in machine learning workflows, image preprocessing, and AI model integration.

Skills

- **Programming Languages:** Python.
- **AI/ML & Data Science:** Machine Learning, Deep Learning, Computer Vision, OCR, Data Analytics.
- **Frameworks & Libraries:** OpenCV, TensorFlow, PyTorch, Flask, Tesseract OCR, scikit-learn, Pandas, NumPy
- **Backend & APIs:** REST APIs, Backend Development, ERP Customization, Workflow Automation
- **Tools & Platforms:** Odoo ERP, Git, GitHub, Power BI, Excel, Figma, VS Code
- **Database:** SQL
- **Deployment:** GitHub Deployment
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Mentoring
- **Hobbies:** Editing, Poetry Writing

Projects

1. AI Sentinel Security Center [GitHub Repository](#)

- Developed an AI-powered Edge Security Monitoring System integrating Computer Vision, Blockchain, and Web3 technologies for real-time surveillance and decentralized threat logging.
- Built a real-time cybersecurity dashboard using Flask, OpenCV, JavaScript, and Chart.js for live threat analytics, event tracking, and AI-based monitoring.
- Implemented face detection and unknown threat identification using OpenCV and face Recognition for intelligent surveillance workflows.
- Integrated blockchain-based immutable threat logging using Ganache and Web3.py to simulate decentralized security event storage.
- Designed a premium cyber-security UI featuring matrix-inspired animations, HUD overlays, live analytics, and real-time monitoring components.
- Optimized low-latency edge AI processing workflows for faster real-time threat analysis and monitoring.

2. Parkinson Risk Analysis System [GitHub Repository](#)

- Developed a machine learning-based predictive system for early Parkinson's disease risk assessment using classification algorithms.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Built data visualization workflows for better medical risk interpretation.

3. Crop Yield Prediction System [GitHub Repository](#)

- Built a machine learning model to predict crop yield using regression algorithms and agricultural datasets.
- Improved prediction accuracy through feature selection and preprocessing techniques.
- Designed the system to support data-driven agricultural decision-making.

4. AI-Powered OCR Business Card Scanner

- Developed an OCR-powered business card extraction system using Python, OpenCV, and Tesseract OCR.
- Automated extraction of contact details including name, phone number, email, and organization data.
- Integrated preprocessing techniques to improve OCR accuracy for real-world image conditions.

5. Power BI Sales Dashboard

- Developed an interactive Power BI dashboard for sales analytics and business performance monitoring.
- Created dynamic visualizations and KPI reports to support data-driven decision-making.
- Improved reporting clarity through automated filtering and dashboard optimization.

6. Offline AI Assistant using Local LLM (In Progress)

- Developing an offline AI assistant powered by local Large Language Models (LLMs) for privacy-focused AI interactions.
- Implementing voice commands, OCR integration, and local automation workflows using Python.
- Designing modular AI pipelines for offline inference and productivity automation.

Certifications

- Certified in Google Cloud Career Readiness Associate Cloud Engineer track– **Google Cloud**.
- Certified in Google Cloud Career Launchpad Data Analyst track – **Google Cloud**.
- AI & Software Engineering Job Simulation – **Electronic Arts & Cognizant**
- Data Analytics Essentials -Professional Certification– **Cisco Network Academy**
- Career Essential in Generative AI – **Microsoft & LinkedIn**
